

Vertical Tunnel

Catalog # 43398

Tunnel frame made with Stainless Steel 1" Box Tubing.
Custom Designed to fit Various Racks already in use.
Custom designed for use with Larger Animals.

Approximate size of Tunnels is 20" wide x 20" Deep x
81-1/2" tall.

Supported on 4 – 5" diameter casters, two with Locking
Brakes.

A removable waste pan is on the caster base frame.
Oversized Caster Base Frame made with 1-1/2" SS Box
Tubing to prevent tipping.

Tunnel openings to cages will be custom sized to fit various
Racks, and to provide a bigger animal door area for the
larger animals. Snouts are adjustable up and down.
Overall Height will approximately match height of previous
Racks already in service.

The width and depth of unit will be approximately 20"
square to comfortably fit cage doors.

Vertical Tunnel can be divided into Upper and Lower com-
partments.

Each compartment can accommodate a removable Waste
Pan/Foraging Tray.

Each removable Waste Pan area has a compartment door
and secure latch.

One wire "snout" per cage door will have removable divider
panels to open and close area.

Lexan Dividers are provided with handle and can be
opened to the left and the right

All walls of Tunnel are 1" x 3" SS Welded Wire Panels.
A Handle Bar is provided for maneuvering tunnel.

Latching mechanism to attach tunnel to Caging Units
provided.
